

## Desktop Calendars

One colour desktop calendar with your company logo and contact details on. Up to full colour available.

## General

We have 18 years experience in corporate design, signage, labels and promotional products. Our customers range from small companies to global corporations.

**Design:** We specialise in corporate design and below the line advertising. Brochures and pamphlets. Design of packaging and point of sale material. Web site layout and design. Microsoft Powerpoint presentation design and trophy design. Our printing service includes everything from budget pamphlets and business cards, to glossy, high quality full colour brochures and books. Posters, packaging and complex die-cutting are within our sphere of expertise.

**Signage:** Electronic Art designs and manufactures a large selection of indoor/outdoor signs using a variety of materials. Sizes vary from small information signs to billboards, 3D-, backlit luminous- and neon signs etc. Our equipment and resources give us the ability to do innovative and creative signage that will set you apart from the competition. What gives us an even greater advantage is that we have professional graphic designers, who can give advice on the use of colour and materials.

**Rubber Stamps:** Rubber stamps offer a high degree of security. Electronic Art is an official dealer for Trodat and Colop self-inking stamps. We manufacture stamps onsite for your convenience.

Visit our web site, we maintain download catalogues of some of our products.

## CD Calendars

The CD calendar consists of 14 pages (front page, 12 months and an info page). Printed in full colour using one of our three standard designs or fully customised design to your specifications. The standard ranges are: African, Corporate and South African Landscapes.

## Tent Stand Calendars

A sturdy calendar made out of 1mm ABS (The same material that your credit cards are made

of). Tough and durable. Lasts a year without any deterioration. Normally printed in one or two colours.

## Perspex Calendars

An executive, high cost and prestigious item. Laser engraved for the corporate arena. Perspex can be cut in any form or shape on the laser. For maximum impact we combine screen printing and engraving.

## Wall Calendars

A3 wall calendars are designed to your specifications. We have a large range of pictures for you to choose from. Normally printed in full colour. These calendars can be laminated for a durable finish.

## Fridge Magnet Calendars

Sizes from A6 to A4 printed in one to full colour. This can be laminated for extra protection and durability. To create an upmarket finish, matt or gloss UV varnish can coat the final product.
